---

☆ Summary

☑ Frontend Engineer with **6+ years** of experience in building high-performance web applications.
☑ Track record of delivering complex projects using **React** and **TypeScript** across various domains.
☑ Expert in modern frontend technologies with full-stack development experience.

💻 Technical Skills

<> Stack

- React & Next.js
- TypeScript
- HTML5 & CSS3
- Express.js

🗄 State

- Redux
- Zustand
- React Query
- Apollo Client

🎨 UI/UX

- TailwindCSS
- Styled-components
- shadcn
- Material UI

🔧 Tools

- REST & GraphQL
- AWS & Jest
- Git & CI/CD
- Webpack & Vite

💼 Professional Experience

Senior Frontend Engineer
Usetech Mar 2024 - Present *1 year*

- Led the frontend development of a **help platform**, enabling users to access and manage support resources, knowledge bases, and chat support.
- Built key features using **Next.js** and **GraphQL**, including content management systems, search functionality, and user authentication.
- Enhanced UI/UX using **Tailwind CSS**, **Shadcn** and **AWS S3** for cloud storage.
- Optimized application performance through **code splitting**, **image optimization**, and **server-side rendering**.
- Worked closely with backend engineers, analysts, and product managers to align features with **business objectives**.

Frontend Engineer
Altabel Group Feb 2023 - Mar 2024 *1 year 1 month*

- Developed and maintained a **food ordering web application** from scratch, serving companies and employees to place and manage food orders efficiently.
- Implemented essential functionalities such as authentication, role-based access, order processing, payments, analytics, and menu creation using **React**, **TypeScript**, and **React Query**.
- Improved application state management with **Zustand** and designed interactive analytics dashboards using **Chart.js**.
- Built responsive design using **MUI** and **Vite**, with deployment through **AWS Amplify**.

Frontend Engineer | Full Stack Engineer
Kreo Software Nov 2018 - Jan 2023 *4 years 2 months*

- Contributed to multiple **SaaS projects** in the construction industry, including Skema AI, Kreo Modular, and SiteShift.
- Developed complex features such as a report builder, SVG-based drawing tools, real-time chats, interactive cost tables, and 3D model integrations using **React**, **Redux**, **Redux-Saga**, and **Styled-Components**.
- Built and maintained **REST APIs** using **Express.js** while integrating cloud storage with **AWS S3** and working with **DynamoDB**.
- Expanded the reusable component library, fixed bugs and wrote unit tests with **Jest**.
